DREAMSPELL ORACLE GUIDE

GUIDE KIN

Fifth force outcome power

Always the same color
as the destiny kin
From the Galactic Compass
Wavespell Ring
find the guiding power
Find the solar seal chip
for the guiding power
and place it in this position

The Oracle Board contains
20 base destiny patterns
The destiny kin
code number is always
in the center of the pattern

Use the code numbers
on the back of the
solar seal chips to
match the code numbers
on the Oracle Board

ANTIPODE KIN

Challenge power
strengthens memory
reconstruction

Same Earth family,
10 code numbers apart
from destiny kin
Find solar seal chip with
code number matching
number in this position

START HERE: DESTINY KIN

Power of solar tribe
basis of life destiny

From the solar seal
of the **galactic gateway**
match code number
of that solar seal chip with
code number in this
center position.

ANALOG KIN

Like-minded power
galactic-solar
planetary partner

Destiny kin code number
plus analog code number
equals 19
Find solar seal chip with
code number matching
number in this position

OCCULT KIN

Hidden power of seven
the unexpected

Destiny kin code number
plus occult kin code
number equals 21
Find solar seal chip with
code number matching
number in this position

The 20 Destiny Kin in the center position follow the time cell sequence:

Red Leaf	cell one	input
White Leaf	cell two	store
Blue Leaf	cell three	process
Yellow Leaf	cell four	output
Green Leaf	cell five	matrix

DREAMSPELL INSTRUCTION CARD
The Journey of Timeship Earth 2013

WELCOME TO DREAMSPELL!
This kit is your personal heritage bundle from the future. Know its parts. Use and protect them well.

DREAMSPELL PARTS:
1. **Galactic Compass Slipcover**
2. **Kwik Reference Card**
3. **Galactic Compass** (front: five turning wheels; back: Galactic Ephemeris)
4. **Galactic Compass Directions**
5. **Harmonic Index** (front) **and Dreamspell Oracle Guide** (back)
6. **Color Cube** (to be assembled using double-sided tape) for storage of Solar Seal Chips
7. **20 Solar Seal Chips** (two sets)
8. **Oracle Board**
9. **Journey Board**
10. **Text: Dreamspell, the Journey of Timeship Earth 2013**

DREAMSPELL: How to Use the Parts

Step 1. The Galactic Compass
Every day of the year has a **galactic gateway**. Take the **Galactic Compass** and **Galactic Compass Directions** and learn to find the galactic gateway for today's date, your date of birth, or any third-dimensional date. The **galactic gateway** is the galactic tone and solar seal corresponding to the date.

Step 2. The Kwik Reference Card
Use the Kwik Reference Card to identify the solar seal and tone of the galactic gateway.

Step 3. The Harmonic Index
The names of the twenty solar seals are listed down the left-hand side of the **Harmonic Index**. This is the same sequence as the counterclockwise daily sequence of the Day Ring of your compass. Find the seal name for the galactic gateway, then follow the color band across until you find the Arabic number corresponding to the tone of the galactic gateway. Now you have found the postion of the galactic gateway on the **Harmonic Index**. Immediately above the galactic gateway in the large white band is the harmonic number. This harmonic number takes you to a corresponding harmonic in the **Book of Kin** (text: pp. 73-138), in which you will find the kin number and destiny spell for the galactic gateway. The harmonic number is always at the top of the page of the **Book of Kin**.

Use the color castle code on the top of the **Harmonic Index** to refer you to the same color leaf of the **Journey Board.**

Use the color time cell code on the right side of the **Harmonic Index** to refer you to the same color leaf of the **Oracle Board.**

Step 4. The Dreamspell Oracle Guide
On the Oracle Guide study the overall form of the base destiny pattern with its five positions. There are four of these base destiny patterns on each leaf of the **Oracle Board.**

Step 5. The 20 Solar Seal Chips
Find the **Solar Seal Chip** in the **Color Cube** that matches the solar seal of the galactic gateway. Note the code number in galactic notation on the back of the **Solar Seal Chip.** Match this code number with the corresponding code number in the central destiny kin position of one of the twenty base destiny patterns on the **Oracle Board.** Place your **Chip** in that position.

Step 6. The Oracle Board
Continue to find the **Chips** to match the solar seal code numbers for the analog, antipode, and occult kin positions of the base destiny pattern of your galactic gateway. Place these **Chips** in their appropriate positions.

To find the guide kin, go to the Wavespell Ring of the **Galactic Compass**, note the solar seal in the guide position just beneath the galactic gateway. You will now have a five **Chip** destiny reading laid out on the **Oracle Board.**

Step 7. The Journey Board
Cross-reference from the **Galactic Compass** Castle Ring to the Castle Code at the top of the **Harmonic Index**. Find the color of the castle in which your galactic gateway is located and find the matching color leaf of the **Journey Board**. From the magnetic gate (tone one) of the Wavespell Ring of the **Compass**, match the magnetic gate of the same wavespell in the color castle of the **Journey Board**. Using the Adventure Wavespell (outside top leaf, **Oracle Board**) find the tone position of your galactic gateway and match it with the gateway seal in the same position of of the wavespell on the **Journey Board**. You have now located your galactic gateway on the **Journey Board** of fourth-dimensional time.

Locate the galactic gateway for today's date and begin to track each day, kin after kin, spin after spin.

GALACTIC COMPASS DIRECTIONS

The Adventure of Using the Galactic Compass
and Entering Fourth-Dimensional Time

The white side of the compass is the Galactic Ephemeris for A.D. 1754 to 2013. On the outer rim is a sequence of 52 galactic gateways. Each of these galactic gateways is a combination of one of thirteen tones (1-13) and one of four solar seals, e.g. 8 **wizard**, 9 **storm**, 10 **seed**, 11 **moon**, etc. For any year on the Ephemeris, each of the 52 galactic gateways correlates to one date only: **July 26**.

1. Using the Galactic Ephemeris: Write down the date you want to look up. **If the date you seek is before July 26, look up the previous year**.

2. Finding the Year: Find the year you are seeking and follow the row to the outer edge. **Write down the tone number and solar seal name**. Using the Kwik Reference Card look up the tone notation and the solar seal. **Turn compass over**.

3. Find **O7.26** on the green outer ring (see diagram on back). Find the **tone from step two** on the yellow ring and align it with **07.26**. Hold the yellow ring in this position.

4. Finding the Correlate Date: On the green ring, find the **boldfaced correlate date** closest to the date you seek. Note the tone on the yellow ring immediately below the correlate date.

If the yellow ring goes blank before the correlate date, find tone seven. Put your thumb on the green position above and to the left of tone seven. Now move the yellow ring so that tone one is in the position held by your thumb. Note the tone immediately below the correlate date. Hold the yellow ring in this position.

5. Matching the Tones: Move the white ring so that the tone matches the yellow tone below the correlate date from step four. There are now two matching tones beneath the correlate date on the green ring. **Hold the green, yellow and white rings in this position.**

6. Finding the Galactic Gateway: On the day ring of the twenty solar seals, **find the solar seal from step two**. Line up that solar seal beneath the two matching galactic tones from step five. You now have the galactic gateway for the green ring correlate date. You may now let go of the Yellow and Green Rings.

7. On the white ring and the day ring each tone and each solar seal represent one day. Starting from the tone and solar seal of your correlate date, you will now **count on the day ring** to find the date you seek. If the date you seek is **after the correlate date, count each seal to the left** (counterclockwise) until you arrive at the date you seek. If the date you seek is **before the correlate date, count each seal to the right** (clockwise) until you arrive at the date you seek. The solar seal that you land on and the tone immediately above it are the galactic gateway of the date you are seeking!

Note: should the solar seal of the day you land on have a white space above it, use the following procedure. The blank spaces on the white ring represent half of a wavespell either preceeding or succeeding, depending upon the direction you come from. If you are counting left (counterclockwise), the blank space on the white ring next to tone thirteen begins the count of tone one through tone seven of the next wavespell. If you are counting from the right (clockwise), the blank space next to tone one begins the count back from tone thirteen to tone seven of the previous wavespell. Wherever your count stops on the day ring, bring the corresponding tone on the white ring to line up with that solar seal.

Congratulations! The solar seal that you land on and the tone immediately above it are the galactic gateway of the date you are seeking! **Now hold the white ring and day ring in this position.**

8. Securing the Wavespell: To determine the wavespell of the galactic gateway, find tone one on the white ring and note the seal immediately below. Move the innermost ring (the wavespell ring) until the same solar seals are lined up below tone one. Now two matching seals are lined up below tone one. This solar seal is the name of the wavespell for your desired date.

9. Locating the Castle: The color of the band directly below the tone one wavespell seals identifies the castle in which that wavespell occurs. Without moving any rings, go back to the galactic gateway seal and note that the seal below this (on the wavespell ring) is the guiding power for the seal. The Earth family of any seal can be determined by the four compass points. Use the color dial to find your Earth family. Go to Harmonic Index and Oracle Guide

February 29 is never counted; just skip over it.

Sample Dates to test yourself:

John Lennon	10.9.1940	10 wizard
Hiroshima Day	8.6.1945	3 eagle
W. A. Mozart	1.27.1756	13 storm
